

Methodology grounds in point-in-time data with an look-ahead discipline, walk-forward + block-bootstrap + CARLO validation, a 31-gate factor filter with pre-registration, multi-source signal aggregation, and statistical-arbitrage cross-sectional signals. AI stack covers retrieval-augmented generation pipelines, MCP server integrations, LLM-as-judge evaluation harnesses, knowledge-graph engineering (NetworkX + Neo4j), and multi-agent orchestration across an 88-agent / 162-skill office.

Production tooling: Python and Rust for quant systems; Typescript and Astro 7 with Cloudflare Pages for deployment. Pedagogy practice is anchored in an 8-corporate doctrine stack – Sun Tzu, Machiavelli, Greene, Munger, Sagan, Deming, Goldratt, Kahneman – and operationalized through the curriculum-engineering + workbook pipeline.

PSHS-SMC 2022 via national competitive exam; US&P engineering units (calculus, physics, differential equations, applied math); UM Financial Management (1st Sem AY 2020-21); STA Tier-1 Certified Technical Analyst (Dec 2022). Based in Digos City, Davao del Sur, Philippines (UTC+8) with 30 hrs/wk availability; open to Senior QR, AI Engineer, and Quant Researcher contracts globally.

- Multi-Agent Architecture & Orchestration
- RAG Pipelines & Hybrid Retrieval
- LLM-as-Judge Evaluation Harnesses
- Model Context Protocol (MCP) Integration
- Knowledge Graphs & Semantic NetworkX & JSONL
- Doctrine-Stack Pedagogy & Curriculum Design
- Python & Rust for Quant Systems
- TypeScript & Astro 7 Front-End Stack
- Cloudflare Pages & Edge Functions
- GitOps & Launched Cron Hygiene
- Jupyter & Lean 4 Quantitative Workflow
- NADA-Scope Discipline & Persona-Agnostic Voice
- Workshop & Workbook Pipeline Operations
- Doctrine-Anchored Strategic Posture

- with multi-source signal aggregation.
- ent-grade candidates on a predictable weekly cadence.
- ure-review turnaround on strategy debates.
- s without expanding the methodology surface area.
- review cycles.
- ed write-ups.
- nifests.
- eval suite.
- ample hit rate.

Python · Rust · TypeScript
Astro 7 · Cloudflare Pages · Edge Functions
Lean · QuantConnect · Jupyter

Doctrinal grounding (voice-line continuity): Sun Tzu Ch.1 (Laying Plans) · Machiavelli Ch.15 (Reputation) · Greene Law 38 · Munger inversion · Sagan extraordinary-claims · Deming SoPK
